

LandscapePro 2 Launched

Unique New Features From Award-Winning Software Developers

July 5th 2017. London, UK. Anthropics Technology Ltd today announced the launch of LandscapePro 2, the latest generation of their intelligent editing software for outdoor photographers. As well as all of the tools available in version 1 (sky replacement, 3D depth estimation, a depth of field simulator, distance controls, and photo-adaptive controls among other powerful features) the new version offers a wealth of improvements including an expanded library of skies, 2D and 3D lighting brushes, sky reflections in water and improved selection brushes.

LandscapePro 2 is designed to make it easy for all outdoor photographers, from total beginners to industry professionals, to edit their own images. The software offers one-click presets for instant results as well as in-depth editing using sliders. No previous photo-editing experience is required and beautiful images can be created in minutes. The software is available in three editions, Standard, Studio and Studio Max, with the higher editions offering plugins for Photoshop and Lightroom.

NEW FEATURES

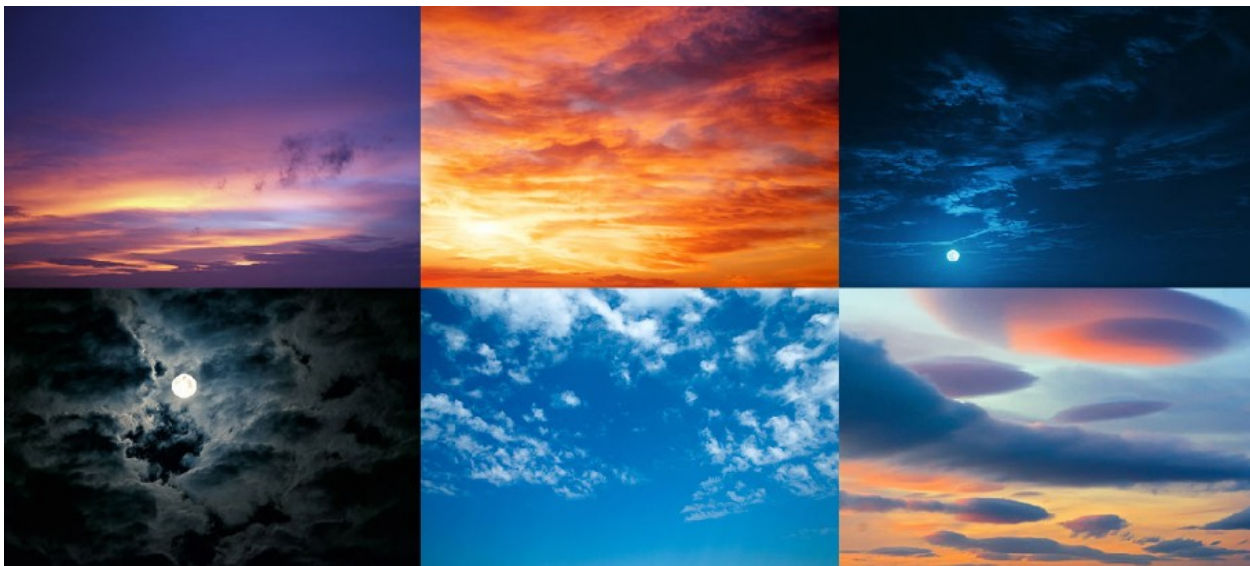

All New Lighting Brushes. Bring the darkroom to your desktop with new Lighting Brushes.

Use the intelligent 3D Lighting Brush like a real light, adding structure and depth to your image. Use the 2D Lighting Brush to achieve traditional dodge and burn effects. [Video](#)

New Skies. The most requested update. More than 100 new skies, including rainbows and storms, give you even more options for transforming your images. [Video](#)

Sky Reflections In Water. Introducing the new Sky Reflections label. Make your images more realistic by adding beautiful sky reflections in the water of your scene. [Video](#)

New & Improved Selection Tools.

- Work on a wider range of images with the new labels such as Snow, Waterfall and Bridge.
- Select fine details with the new Smart Brush. [Video](#)
- Easily switch between areas.
- Lock areas to edit quickly and precisely.
- Achieve more realistic sky replacements with the Expand Brush. [Video](#)

EDITIONS AND PRICING

Standard - Dedicated landscape photo editing.

Studio - Handles RAW files and can be run as a plugin to Photoshop and Lightroom.

Studio Max - Includes Batch Mode and histogram panel for maximum control.
